During 1995, nine cultivar names in unassigned woody genera were registered. Photos and herbarium specimens, where indicated, have been deposited in the Brooklyn Botanic Garden Herbarium. Anyone who is involved in originating or introducing new cultivars of ornamental plants is urged to assure that the names are registered with a view to nomenclatural stabilization. A list of the International Registration Authorities is available from the American Association of Botanical Gardens and Arboreta, 786 Church Rd., Wayne, PA 19087, USA.

*Acer saccharinum* ‘Silver Cloud’. Registered 3 Oct. 1995. Registrants: Rick Durand, Prairie Shade Consulting Services, 89 Wilkinson Crescent, Portage la Prairie, MB R1N 1A7, Canada, and Wilbert Ronald, Jeffries Nurseries, Box 402 Portage la Prairie, MB R1N 3B7, Canada. *Acer saccharinum* ‘Silver Cloud’ has an upright, oval form with narrower branch angles and compact crown compared to ‘Northline’, which has wider branch angles and its crown is much more open-headed and loose. It is considered hardy to U.S. Dept. of Agriculture zone 3.

*Atriplex lentiformis* ‘Playa’. Registered 3 July 1995. Registrant: Gwen Meyer, horticulturist, National Plant Materials Center, Building 509, BARC–East, Beltsville, MD 20705. The origin of the plant is unknown. The Tucson Materials Center received the plant from the Agricultural Research Service (ARS) Plant Introduction Center, Beltsville, Md. ARS received seed from Israel via Venezuela. *Atriplex lentiformis* ‘Playa’ demonstrated the highest rates of establishment and growth under arid conditions and has been selected as the best cultivar from a seedling population from the Beijing Botanic Garden, 1000 Washington Avenue, Brooklyn, NY 11225-1099, USA. *Atriplex lentiformis* ‘Playa’ demonstrated the highest rates of establishment and growth under arid conditions and has been selected as the best cultivar from a seedling population from the Beijing Botanic Garden, 1000 Washington Avenue, Brooklyn, NY 11225-1099, USA.

*Exochorda serratifolia* ‘Northern Pearls’. Registered 3 Oct. 1995. Registrant: Harold Pellett, Minnesota Landscape Arboretum, P.O. Box 39, 3675 Arboretum Dr., Chanhassen, MN 55397. Pellett selected this plant from a cross between *Tilia cordata* ‘Arnold Red’ and *Parthenocissus quinquefolia* ‘Dark Green Ice’. This cultivar is resistant to witches broom aphid and has a deeper rose-red flower color than the species. A description and photograph can be found in *Landscape Plant News* [4(2):10; June 1993].

*Tilia cordata* ‘Golden Cascade’. Registered 6 July 1995. Registrant: Wilbert G. Ronald, Jeffries Nurseries, P.O. Box 402, Portage la Prairie, MB R1N 3B7, Canada. This cultivar is similar to *T. cordata* Norlin (‘Ronald’) but with cascading branches, globe-shaped crown, and golden foliage in the fall. It grows in moist, well-drained loam and clay loam in semi-protected areas and is considered hardy to zone 2b of the Canadian Plant Hardiness Map.

*Tilia mongolica* ‘Harvest Gold’. Registered 6 July 1995. Registrant: Wilbert G. Ronald, Jeffries Nurseries, P.O. Box 402, Portage la Prairie, MB R1N 3B7, Canada. This cultivar was selected for its upright form, excurrent growth, exfoliating bark, and consistent golden-yellow fall color. It is adapted to moist, well-drained loam and clay loam in semi-protected areas and is considered hardy to zone 2b of the Canadian Plant Hardiness Map.
